70% OF BIG
PROJECTS FAIL

So, How do we TRANSFORM???

.1.

**START WITH BUSINESS USE
CASES, NOT TECHNOLOGY**

**.2.
ACHIEVE QUICK WINS**

**.3.
CREATE A DATA DRIVEN
CULTURE**

**.4.
IDENTIFY DEPARTMENTAL
LEADERS & CHAMPS**

**.5.
BUILD THE TRUST LAYER
ALONG WITH STRONG
GOVERNANCE**

.6.

**OFFER SELF SERVICE ACCESS
TO THE BUSINESS USERS**

**.7.
LEARN TO WORK & PLAY WITH
DATA**

.8.

**FIND NEW VALUES WITH THE
EXISTING DATA**

.9.

**CAPITILISE ON 3RD PARTY
MODELS & BENCHMARKS**

.10.

**DRIVE ACCOUNTABILITY &
BEHAVIOUR CHANGE**

HC IT Transformation

An enterprise data strategy is a vital step in the journey from fragmented data to the actionable insights that drive transformation in our new healthcare economy.

Focus on one or two small use cases and promote those successes to build goodwill and support for further initiatives.

Self-service access lets business users perform analysis, run ad-hoc reports, and investigate hunches to identify the root causes of trends.

Centralizing all the Transformational Projects within IT may often makes organizational sense, but it is important to balance technical proficiency with a solid understanding of business issues and use cases.
