HEALTH TECH
2025

**Quality Care towards
GOOD HEALTH AND WELL-BEING**

 **7th March, 2025**
 **The Park, Kolkata**

OVERVIEW

Indian healthcare landscape is transforming through rapid growth accelerated by increasing demands for affordable quality care, advancements in technologies and a mounting focus on preventive healthcare. Key trends include the rise of telemedicine, digital health platforms, AI integration for diagnostics and treatment, and the expansion of health insurance coverage. Public-Private Partnerships are also playing a crucial role in improving healthcare access in underserved regions.

Quality healthcare is essential to achieve the Sustainable Development Goal 3 (GOOD HEALTH AND WELL-BEING) of the United Nations aiming to be achieved by 2030. The Goal includes achieving universal health coverage, including financial risk protection, access to quality essential healthcare services and access to safe, effective, quality and affordable healthcare services and deliveries. However, sole focus on universal coverage will not lead to desired goals. **It is important to address the critical issue- quality and standardization in healthcare system.**

As reported by WHO, **digital health solutions and the use of health data provide excellent opportunities to build better and more resilient health services while improving quality of care.**

HEALTH TECH 2025

The Bengal Chamber of Commerce and Industry (BCC&I) is presenting the **8th edition of Health Tech Summit with PwC India, as the Knowledge Partner. Theme: Quality Care - towards GOOD HEALTH AND WELL-BEING**

The programme will also include discussions on biotechnology which can revolutionize the future of healthcare by offering new ways to prevent, diagnose, and treat diseases. **Biotechnology stands at the forefront of innovation and progress in the rapidly evolving healthcare technology industry.**

Improving healthcare quality and safety is a growing focus in healthcare systems, as medical institutions aim to achieve efficiency, reduce healthcare costs and ensure high-quality patient outcomes. This year's Health Tech will discuss WHO's overview of **quality care, safe, effective, patient-centered to achieve the healthcare delivery as timely, equitable, integrated and efficient.**

Health Tech, this year, will bring together Technology Providers, Healthcare Institutions, Consultants, Academicians, Start ups, Investors to deliberate on quality in healthcare leveraging emerging technologies.

Discussions include:

**Policymakers
Addresses**

**Leadership
